ReadyNAS™ for Home

Protect, Store, Share at Home

ReadyNAS is the heart of your digital home. Easily attach directly to your home network; guard your files, photos and digital media from loss and share with your computers, game consoles and media players.

ReadyNAS products are built in sturdy steel housings and backed by a minimum three-year warranty from NETGEAR.

Maximum Affordability

ReadyNAS Duo

Great Solution

ReadyNAS NV+

Maximum Performance and Reliability

ReadyNAS Pro Pioneer Edition

PROTECT

Multiple layers are built into all ReadyNAS products that protect data on the disks, across your network and even outside of your home.

Backup
One ReadyNAS can be the target for multiple home systems, ending the problem of managing media and confirming backup job status.

ReadyNAS Vault
ReadyNAS Vault makes backup to an offsite data center simple and affordable enough for home users. Optional ReadyNAS Vault software is tightly integrated into ReadyNAS storage systems, so you can confirm results, make changes, and recover files from any Internet location. You determine what you want protected and ReadyNAS Vault automatically and securely copies it to the data center.

RAID
Every system automatically protects data from disk drive failures.

STORE

ReadyNAS systems can collect data from all types of devices at the same time, with no additional software to install and no new complexity.

Cross-platform Support
Save data from Windows®, Macintosh® and UNIX®/Linux® systems while capturing photos from a digital camera and downloading the latest album purchase from the Web – all at once.

Mac-friendly
All ReadyNAS products are built to work with Apple® Macintosh systems, supporting native file sharing (AFP) and Time Machine™. Bonjour® software technology and Macintosh status monitoring widgets make discovery and network setup a breeze.

Expansion
ReadyNAS X-RAID™ means growth on your schedule. Need more capacity? Just add a drive. Need more? Add another drive, or upgrade an older one. Your data stays up and running, protected and available throughout.

SHARE

Network storage gets the data you want to the places you need at electronic speeds.

Media
The ReadyNAS system can stream music, video and photos to most network-capable media streaming devices, or a PC or a Mac. There's no need to run your computer all the time!

Photos
Drop photos directly from your USB camera onto the ReadyNAS, and then share them on the Internet with ReadyNAS photo tool.

Devices
Attach your USB hard drives, printers and digital cameras to the USB port to share their functions or capture photos.

Welcome to the ReadyNAS World!
